Christopher Hamam | Game Designer

240-401-1911 | chrishmets2304@gmail.com | chrishgames.com | linkedin.com/in/chris-hamam | github.com/chris00004

HIGHLIGHTS OF QUALIFICATIONS

- **Collaborative spanish speaking designer**, professional experience with **mechanics** and **level design** in **cross-functional teams**
- **Design experience**, with **complex** player **movesets**, **dynamic** environmental **mechanics,** gameplay **balancing and pacing**
- Level design experience in **VR, 3D, 2D fast-paced games**, using **sketches, wireframes,** and **flowcharts** to plan layout and progression
- Strong foundation in **C++, C#, Java, GDScript**, **OOP programming**, with hands-on experience **scripting, prototyping, debugging**
- Proficient in **Unity, Unreal Engine 4, Visual Studio, Godot,** and **GameMaker Studio 2**, supporting experience in **Blender** and **Maya**

GAME DESIGN AND DEVELOPMENT EDUCATION

Rochester Institute of Technology, College of Computing and Information Sciences — **Rochester, NY**
Accelerated Combined Bachelors & Masters of Science, Game Design and Development — Expected May 2028

- **GPA**: 3.52 and accelerated progress towards graduate degree for Game Design and Development
- **Relevant Courses**: Graduate [**Game Design, Game Design Processes, Production Studio**] Undergraduate [**Game Design and Development I–II, Level Design I, Experiential Design, Real Time Games Simulation I–II, Interactive Media Development**]

SKILLS

Languages | Proficient: **C++, C#, GDScript, GameMaker Language, UE4 Blueprints** | Moderate level: **Java, HTML, JavaScript, CSS**
Software and Tools | **Unreal Engine 4, Unity, Godot, Visual Studio, GameMaker Studio 2, GitHub, Perforce, Blender, Maya**
Skills | **Gameplay Moveset Design, Mechanics Design, Game Systems & State Machine Design, Level Design, Encounter Design, AI Behavior Design, 3D Game Logic & Math, Cross-Functional Team Coordination, Fluent Spanish Speaker**

GAME DESIGN AND DEVELOPMENT EXPERIENCE

Foundry 2D | **Lead Designer | Levelsmith Labs | Shipped** — *Rochester, NY*
Godot 4.7, GDScript, Github, Figma — **May 2026 - August 2026**

- **Directed team** of **4** designers using a **critique-driven design process** anchored to **3 core pillars, full spec & 80% of stretch goals**
- **Designed intuitive** core **level creation systems:** entity duplication, property manipulation, multi-tool input schemes, asset manager
- **Led UI/UX design** for **level prototyping tool** including **visual style, design language,** and consistent **menu layouts and icons**
- **Shipped** to **itch.io,** currently **being trialed** by **R.I.T.** as the **primary 2D platformer tool** for its level design courses

Changeling VR | **Level Design Intern | Magic Spell Studios | Shipped** — *Rochester, NY*
Unreal Engine 4.27, Blueprints, Perforce, ClickUp — **May 2025 - August 2025**

- **Pitched and led ground-up redesign** of a core **narrative level**, using **sketches**, **layout studies**, and progression planning
- Designed and implemented **level layout, gimmick sequencing,** and **environmental framing** to reinforce narrative weight
- Collaborated **cross-functionally** with writers, artists, and audio to align composition, lighting, **set pieces, and gameplay flow**
- **Shipped fully reworked level** to **Steam** that significantly **increased** playtester **engagement** and guided **sense of direction**

PERSONAL GAME DESIGN EXPERIENCE

Game Developer, *GhostFlame* | *Solo Project* | Shipped — **December 2023 - August 2025**

- Developed top-down **3D high-speed platformer** in **GameMaker Studio 2** focused on **dynamic** mastery-driven **mechanics**
- Designed **linear branching levels** with **multiple paths rewarding** routing **mastery, memorization**, and **high-speed** execution
- **Optimized core gameplay** systems including chained dash traversal, extensible state machine, and **spatial partitioning**
- **Shipped** playable **vertical slice** with **mastery-ranking loop**, proving **engaging** mastery-driven design through **playtester replays**

Game Developer, *Stay In The Loop* | *Solo Project* | 2025 GMTK Game Jam | Shipped — **August 2025**

- Programmed advanced **NPC AI** with preset and randomized behaviors, enabling platform traversal and **dynamic decision making**
- Designed levels around **grapple traversal points** with careful placement for **player flow, smooth aiming,** and **engagement**
- Balanced **AI complexity** and **environmental challenges** to encourage fast **decision-making** under time pressure
- **Delivered polished playable jam build** with functioning AI and grapple traversal, **validating the core loop** under a **hard deadline**

Game Developer, *Pumpkin Slasher* | *Team Project* | RIT x Granola.gg Game Jam | Shipped — **October 2024**

- Designed **dual-perspective gameplay system** switching between **in-game** arcade horror and **first-person** repair interactions
- Developed **3 modular error mini-games** integrating **narrative tension** with **mechanical problem-solving**
- **Playtested** and refined perspective transitions, ensuring **clarity**, consistent **flow**, and **continuity** between both perspectives.
- **Delivered polished playable build**, earning a **Special Award for Creativity** validating the **perspective-swap** system **game loop**

EXTRA CURRICULARS & ACCOLADES

- **RIT Game Development Club, GMTK Game Jam** (2022, 2025)**, RIT x Granola.gg Game Jam** 2024**, Winter MelonJam** 2025
- **13,000+ downloads** & **4.6/5 stars** on 2021 **Sonic Amateur Games Expo** submission *"Sonic Discovery"* (unofficial fan-game)
- **Special Award for Creativity**, recognizing originality in gameplay and design for 2024 RIT x Granola.gg submission *Pumpkin Slasher*
