

Christopher Hamam | Game Designer

240-401-1911 | chrishmets2304@gmail.com | [linkedin.com/in/chris-hamam](https://www.linkedin.com/in/chris-hamam) | chrishgames.com | github.com/chris00004

HIGHLIGHTS OF QUALIFICATIONS

- Strong foundation in **C++, C#, Java, GDScript, OOP programming**, with hands-on experience scripting, prototyping, and debugging
- Gameplay development experience across **solo and team projects**, including **combat, traversal, event scripting, and level design**
- Proficient in **Unity, Unreal Engine 4, Godot, and GameMaker Studio 2**, with supporting experience in Blender, and Substance Painter
- Level design experience in **VR, 3D, 2D fast-paced games**, using **sketches, wireframes, and flowcharts** to plan layout and progression
- **Collaborative spanish speaking designer**, professional experience with **mechanics, gameplay, visuals in cross-functional teams**

COMPUTING AND DESIGN EDUCATION

Rochester Institute of Technology, College of Computing and Information Sciences

Rochester, NY

Accelerated Combined Bachelors & Masters of Science, Game Design and Development

Expected May 2028

- **GPA:** 3.52 and accelerated progress towards graduate degree for Game Design and Development
- **Relevant Courses:** Game Design, Game Design Processes, Game Design and Development I-II, Level Design I-II, Experiential Design, Real Time Games Simulation I-II, Interactive Media Development, 3D Asset Production

SKILLS

Languages | Proficient: **C++, C#, GameMaker Language, GDScript** | Moderate level: **Java, HTML, JavaScript, CSS**

Software and Tools | **Unreal Engine 4, Unity, Godot, GameMaker Studio 2, Blender, Substance 3D Painter, Photoshop, GitHub, Perforce**
Skills | **Gameplay Programming, Mechanics Design, Game Systems & State Machine Design, AI Behavior Design, Level Design, 3D Game Logic & Math, Iterative Design, 2D Art & Animation, 3D Modeling, Cross-Functional Team Coordination, Fluent Spanish Speaker**

GAME DESIGN AND DEVELOPMENT EXPERIENCE

[Foundry 2D](#) | Lead Designer | Levelsmith Labs

Rochester, NY

Godot 4.7, GDScript, Github, Figma

May 2026 - August 2026

- Led UI/UX design for level prototyping tool including **visual style, design language**, and consistent **menu layouts and icons**
- Designed intuitive **core systems**: entity duplication, property manipulation, multi-tool input schemes, asset manager, **UX flow**
- Directed a team of 4 designers using a **critique-driven design process** anchored to **3 core pillars, full spec + 80% of stretch goals**
- Shipped to [itch.io](#), subsequently adopted by R.I.T. as the **primary tool** for its level design course

[Changeling VR](#) | Level Design Intern | Magic Spell Studios

Rochester, NY

Unreal Engine 4.27, Blueprints, Perforce, ClickUp

May 2025 - August 2025

- Pitched and led **ground-up redesign** of a core narrative level, using sketches, layout studies, and progression planning
- Designed and implemented **level layout, gimmick sequencing, and environmental framing** to reinforce narrative weight
- Collaborated **cross-functionally** with writers, artists, and audio to align composition, lighting, **set pieces, and gameplay flow**
- Shipped fully reworked level to [Steam](#) that **increased** playtester **engagement ~80%** and guided **sense of direction ~150%**

PROJECT EXPERIENCE

Game Developer, [GhostFlame](#) | Solo Project

December 2023 - August 2025

- Designed top-down 3D **high-speed platformer** in **GameMaker Studio 2** focused on **dynamic mastery-driven mechanics**
- Engineered **linear branching levels** with **multiple paths rewarding** routing mastery, memorization, and high-speed execution
- Optimized **core gameplay** systems including chained dash traversal, extensible state machine, and **spatial partitioning**
- Shipped playable **vertical slice** with working **mastery-ranking loop**, proving out the mastery-driven state machine architecture

Game Developer, [Stay In The Loop](#) | Solo Project | 2025 GMTK Game Jam

August 2025

- Programmed advanced **NPC AI** with preset and randomized behaviors, enabling platform traversal and **dynamic decision making**
- Designed levels around **grapple traversal points** with careful placement for **player flow, smooth aiming, and engagement**
- Balanced **AI complexity** and **environmental challenges** to encourage fast **decision-making** under time pressure
- Delivered **polished playable jam build** with functioning AI and grapple traversal, **validating the core loop** under a **hard deadline**

Game Developer, [Pumpkin Slasher](#) | Team Project | RIT x Granola.gg Game Jam

October 2024

- Developed **dual-perspective gameplay system** switching between **in-game horror** and **first-person repair interactions**
- Engineered **seamless perspective swapping** while preserving **player state, enemies, objectives, and world continuity**
- Designed and programmed 3 **modular error mini-games** integrating **narrative tension** with **mechanical problem-solving**
- Delivered **polished playable build**, earning a **Special Award for Creativity** proving the perspective-swap system game loop

EXTRA CURRICULARS & ACCOLADES

- RIT Game Development Club, GMTK Game Jam (2022, 2025), RIT x Granola.gg Game Jam 2024, Winter MelonJam 2025
- 13,000+ downloads & 4.6/5 stars on 2021 Sonic Amateur Games Expo submission "[Sonic Discovery](#)" (unofficial fan-game)
- Special Award for Creativity, recognizing originality in gameplay and design for 2024 RIT x Granola.gg submission [Pumpkin Slasher](#)
